Social media

“When you see the CVs of big academics, they’ve done all these things. It wasn’t a strategy – they just did them.”

“Academia is a meritocracy,  
but it’s also about

reputation management.

More senior academics might not see this, but  
as a junior academic – and a woman –

proactively managing your  
reputation is really important.”

# Social media “democratizing reputation”

The role and visibility of publications

# In the bubble

Impact factors  
don't mean  
anything!

It's about the  
quality of the work,  
not the brand of  
the journal

@charlierapple

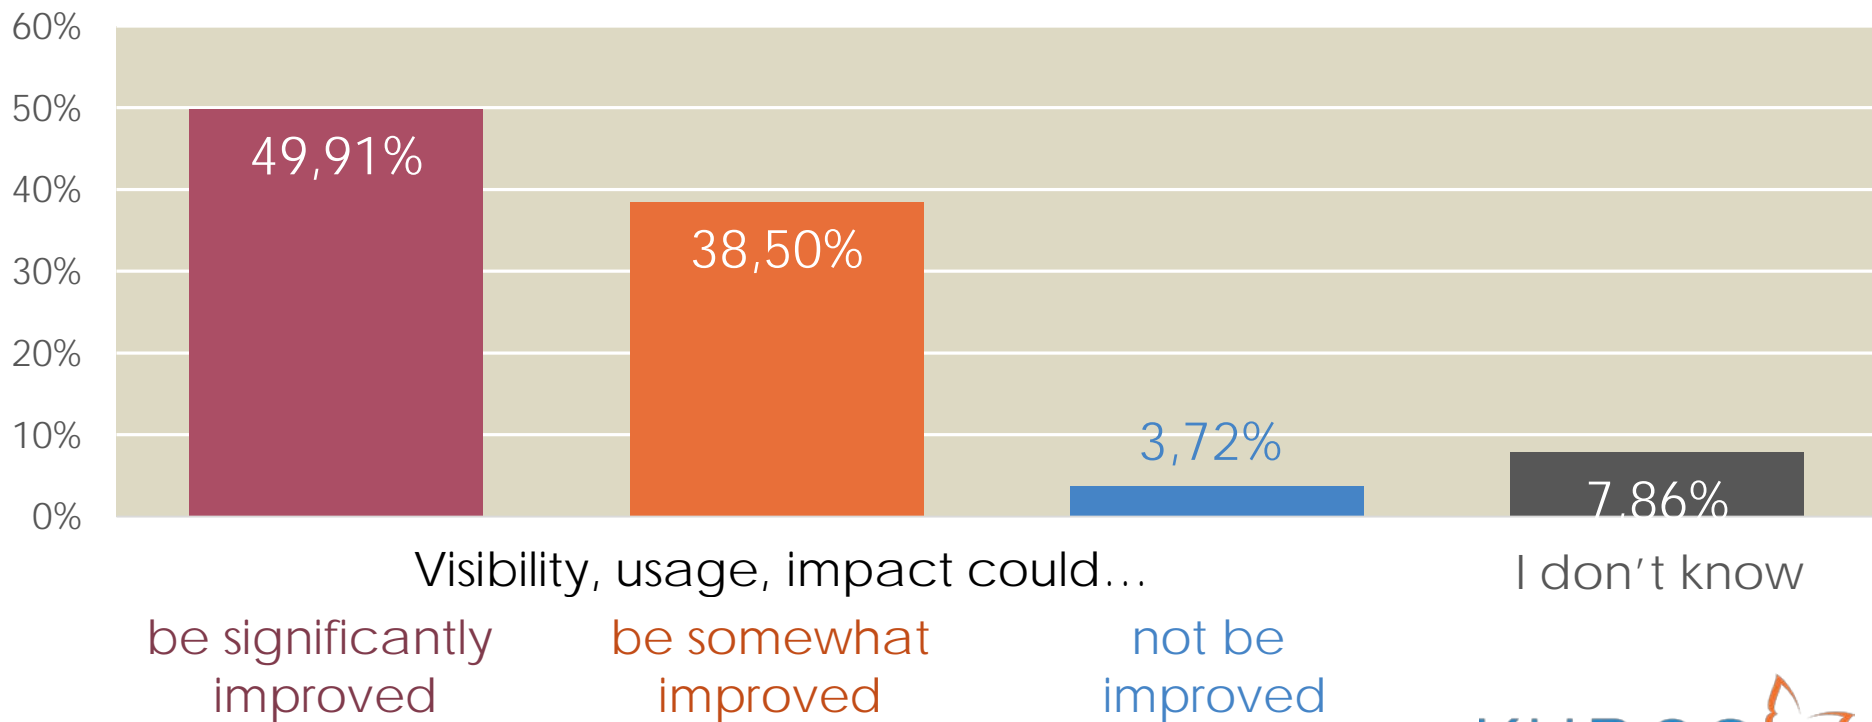

#fiesoleretreat16

# In reality

OMG turns out she's not just a temp, she's had a paper in Nature!

# To what extent do you think more could be done to increase the visibility, usage or impact of the work you publish, on or after publication? (n = 2,900)

# In which of the following ways do you currently create awareness of or share materials relating to your work?

(n = 2,826)

0% 20% 40% 60% 80% 100%

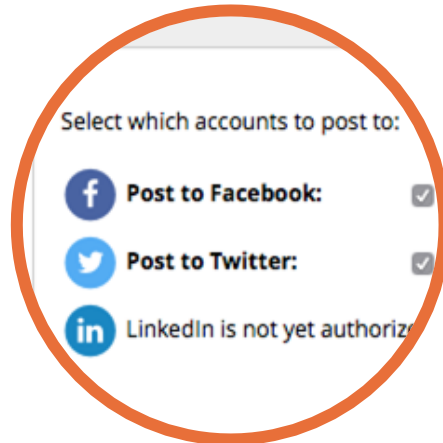

Actions = data = answers?

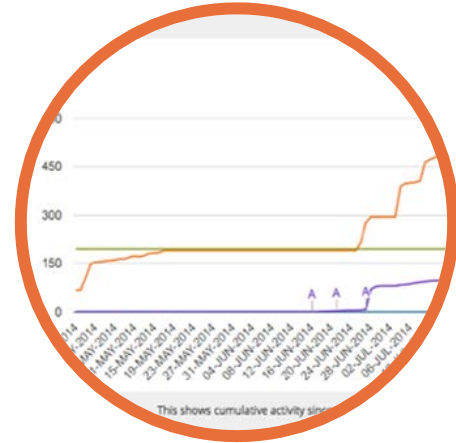

# Brief background: what is Kudos?

Plain  
language  
explanations

Trackable  
links for  
sharing

Range of metrics  
against which to  
map efforts to  
explain and share

# Open vs closed communications

**OPEN**

channels – nothing to restrict visibility of sharing of work, except time and effort in finding / following / filtering

**MEDIATED**

channels – possible, but less likely, for publisher / institution to have visibility of sharing

**CLOSED**

channels – very unlikely that publisher / institution will be connected with researcher and have visibility of sharing efforts here

% of publications shared in this channel

Facebook is more commonly used for sharing academic work than you might expect

# publications with **share actions in Kudos**  
*n* = 4,610  
Publication can be shared in more than one channel

But links shared via LinkedIn are most likely to be clicked

@charlierapple
