2. Tools | open-source DIY platform—Github, tutorials, workshops

<https://recogito.pelagios.org/>

The screenshot displays the Recogito web interface. At the top, there is a navigation bar with the 'Recogito' logo on the left and a 'Log In' button on the right. The user is logged in as 'rainer'. Below the navigation bar is a toolbar with icons for editing, location, chart, download, user, and tools. The main content area is divided into three sections: 'Annotations', 'Places', and 'Annotated Document'. Each section contains a list of export options with corresponding download buttons.

Annotations

- CSV: Download annotations as a data table for importing into spreadsheet software or a GIS. [Download CSV](#)
- RDF: Download annotations and document metadata as RDF, encoded using Open Annotation and Dublin Core. [Download JSON-LD](#) [Download RDF/Turtle](#) [Download RDF/XML](#)

Places

- GeoJSON: Confirmed geo-located places in the document as a GeoJSON FeatureCollection. [Download GeoJSON](#)
- KML: Confirmed geo-located places as KML file, for viewing in Google Earth. [Download KML](#)

Annotated Document

- TEI: The annotated text in a basic TEI/XML serialization. Note: only place name annotations are included at the moment. Also, overlapping annotations are filtered out as TEI does not support them. [Download TEI/XML](#)

On the left side of the interface, there is a map view showing a historical map with red lines and text. Below the map, there is a 'TOOLS' menu with options for 'MOVE' and 'TIL'. On the right side, there is a 'Log In' button and a 'VERIFICATION STATUS' section. Below that, there is a text snippet: 'e had sacked the manners ve his own for they o the god hter of Jove,' and an 'OK' button. At the bottom right, there is a text snippet: 'l 2018 in'.
